

## International Topical Forum on Nuclear Powered “Belt and Road”: Education, Evolution, and Energy (E<sup>3</sup>)

### About the Event

To effectively broaden the scope and depth of international nuclear energy development and educational cooperation, and to establish an exemplary project under the "Belt and Road" initiative, Harbin Engineering University will host the **International Topical Forum on Nuclear Powered “Belt and Road”: Education, Evolution, and Energy (E<sup>3</sup>)**, with the guidance of the China Atomic Energy Authority. The forum is scheduled to be held in Harbin from July 5 to 7, 2023. We cordially invite all current and prospective collaborative organizations to designate representatives to attend the event to support financially more young talents to study in China within the framework of the government scholarship program, share the most advanced achievement of nuclear technology of China, exchange ideas, and engage in productive discussions on the new international cooperation patterns for education and technology.

### Topics of Interest

#### **Education**

- Review & outlook of Chinese Gov. Atomic Scholarship
- Teach, learn, and cooperate within international community
- Joint education possibilities

#### **Evolution**

- Novel technology & application in the nuclear industry
- Got achievement? From a new startup to a better life
- Make nuclear more accessible

#### **Energy**

- Low carbon, low emission, but never lower standard
- Comprehensive application of nuclear + renewable energy
- New page of cooperation
